

PEERLESS 14' SINGLE AXLE HYDRAULIC HAULING TRAILER

This heavy, all steel welded body has a 10 ga. bottom floor. It comes with the true towing single axle 8 ton or 12 ton running gear which makes it easier to back into position. The 8T trailers come with 9.5L 8ply implement tires. The 12T trailers come with 12.5L 12ply implement tires. The scissor type hydraulic hoist can be powered with a tractor or hydraulic power unit. For easier unloading, our standard trailer is equipped with a rear gate that is hinged across the top. Optional barn doors are available (as shown in photos).
