

PEERLESS 28' DRYING TRAILER

This is our largest trailer which is rated for a 10 ton hauling capacity. This wagon differs from our 21' in that it has both front and rear axle oscillators. It also comes with a ball bearing 5th wheel and is available with an 18" X 60" side or rear opening. Standard equipment includes spindle sleeves with bolt-on spindles, clean out doors, 9.5L 8 ply implement tires, a heavy duty rear bumper, 14 gauge bottom floors, tongue support and a chain to keep the tongue in place while dumping. Optional FI tires are available. For easier unloading, our standard trailer is equipped with a rear gate that is hinged across the top.
