

PeerSouth

45' ALL STEEL SEMI DRYING TRAILER

PeerSouth has developed the 45' "All Steel" drying trailer out of a concern for "safety" and "consistency". We start with a carefully selected, heavy duty container chassis and attach an all steel drying box to it. This drying box is specifically designed to dry peanuts in the same reliable fashion as the traditional wagons... consistently and efficiently. Our drying box is made available to you in varying side heights to help insure against overloading problems. They all come standard with a sample door and new landing gear outfitted with "sand feet" for better stability in the field.

Current options include:

New Tires and Rims

Retread Tires and Rims

Sandblast Chassis

Brake/Drum work
(quoted separately)

Clean Out Gate

Tarp
