

"The folks that invented peanut drying."

SEMI TRAILER DRYERS

Our dryer offers consistent drying times on 22-25 ton loads that are comparable to standard trailer tonnage loads. Our stainless burner provides maximum heat output and durability. This dryer offers simple controls, lasts longer, and requires fewer replacement parts. It is available in two sizes: 36" and 42" and works well with our optional automatic temperature controller, the PeerStat. This model is available with a stand or a running gear.
