

"The folks that invented peanut drying."

WHISPER DRYERS

These are the same dependable Peerless dryers with a backward incline blower. They are being used all over the world to dry various products. They boast the new style burner providing maximum energy efficiency, heat output and durability. These dryers offer simple controls, last longer and require fewer replacement parts and are available with our optional automatic temperature controller, the PeerStat. These dryers come in two sizes and can discharge from the top or bottom. They are available in single phase or 3 phase and will operate off of Natural or LP gas.
