

PEERLESS 26" DUAL DRYER

This powerful dryer with its 10-12 HP motor can be used to dry one or two trailers by using a swinging gate to cut off either side. It is available with single phase or 3 phase and will operate off of Natural or LP gas. With the delivery of 16,800 CFM's at 1.0 static pressure, this dryer gives even drying throughout the load. The two trailer dryer has the self-cleaning star type burner which delivers up to 1,100,000 BTU's of evenly distributed heat. Our hinged access panel allows easy access to the burner for maintenance. The controls are in a module for quick and easy maintenance. This unit has an 8 blade 26" fan.
