

## PEERLESS JET DRYER

This fast drying compact unit can be hung on a swing arm to eliminate having to back a trailer into position offering a quick and convenient connection or mounted on skids for easy mobility. It is available in two sizes and single phase or 3 phase and will operate off of Natural or LP gas. The 5-7 HP unit has a 22" fan. The 10-12 HP unit has a 26" fan. The Star type burner is designed for uniform drying, is self-cleaning and delivers up to 1,100,000 BTU's of evenly distributed heat. Our hinged access panel allows easy access to the burner for maintenance. It is available with our optional automatic temperature controller, the PeerStat. The Jet Dryer gives excellent drying in pecans, grain, nuts, and seed of all kinds.
